JAMES MCINTYRE

Full stack software engineer who loves building pixel-perfect product experiences. I love working with diverse teams, energizing people around a vision, and inviting challenge.

some of my favorite things

JAVASCRIPT, REACT, REDUX, NODE, CSS, GRAPHQL, REST, SERVERLESS, PYTHON, DOCKER, KUBERNETES, AWS, GCP

EXPERIENCE

SR SOFTWARE ENGINEER
Luminary Media
New York, NY

(March 2019 to Present)

Worked throughout Luminary's product launch to build-out their consumer web app, marketing landing pages, internal CMS applications to manage their large podcast catalog and building deep integrations with 3rd-party analytics platforms like Segment and Optimizely. I was the lead engineer for managing Optimizely integrations throughout our stack as well as designing the process by which the organization managed new experiments. I also had the chance to conceptualize and execute numerous projects to improve the web teams developer experience and overall productivity. This included budgeting time for mentorship and feedback so our team could iterate on its processes. LARGE-SCALE CONSUMER APP FOR MOBILE AND DESKTOP WITH MILLIONS OF REQUEST PER MINUTE AND HIGH-STAKES OUTCOMES

SOFTWARE ENGINEER III
Walmart Labs
Sunnyvale, CA

(May 2016 to June 2018)

Worked on the core platform team to help implement and migrate large-scale full-stack, isomorphic React/Redux/Node e-commerce apps over to the open source Electrode platform built by Walmart Labs core team. Ran teams of ~6-8 engineers on numerous high-value projects. We took ownership of the entire stack from our internal dev-ops to server logging to custom analytics implementation. I also built a new automated testing tool which monitors the health of our app and its upstream microservices by continuously running functional tests and reporting results visually in realtime. During my last year I was promoted to leading teams on the new Walmart Grocery project. My teams along with a few other full-stack teams took grocery.walmart.com from less than 100 stores to running live in 1,500 stores with millions of users. LARGE-SCALE ISOMORPHIC REACT-REDUX, DEV-TOOLING, MIGRATIONS

FULL STACK JAVASCRIPT DEVELOPER
Web Three
San Francisco, CA

(March 2016 to May 2016)

Worked on various MEAN stack projects. One of the products I worked on was soundninja.com (startup now defunct) where I refined the mobile experience. In other projects my scope was to mock up UI using Sketch, refining it to a pixel-perfect design and then implementing the mockups in Angular/Sass. REACT, REDUX, ANGULAR, EXPRESS, NODE, MONGO, VANILLA JAVASCRIPT

FRONT END WEB DEVELOPER
mailparser.io
Paris, France

(March 2015 to June 2015)

Developed and implemented a user growth campaign that included a survey sent to the entire user base with the goal to identify key functionality which would be improved for increased conversion going forward. EMAIL APIS, HTML, SASS, SKETCH

PURCHASING COORDINATOR (ENG.)
Roto
Columbus, OH

(September 2013 to December 2015)

Built an internal web application to handle all Purchasing related tasks for the 75+ employees. This took the company from a time-consuming, redundant workflow consisting of static PDF forms and numerous emails to a completely web based, easy-to-use system which requires little training and no redundant data entry. Numerous other business applications can built on top of this work. The app I built is still used every day company-wide. HTML, CSS, JQUERY, JAVASCRIPT, NODE

IT CONSULTANT
Eric Madden Consulting
Columbus, OH

(January 2013 to July 2013)

Brought 10+ years of professional IT experience to this consultancy which enabled me to help accelerate their early rapid growth in which I managed high-level network support with large clients. DEEP UNDERSTANDING OF NETWORKING STACK

MARKETING INTERN
eProximiti (now Duet Health)
Columbus, OH

(February 2008 to January 2009)

I helped eProximiti with various marketing and design related initiatives including working closely with app developers to design intuitive mobile user interfaces for smartphone apps. eProximiti was on the cutting-edge of hyper-local geo-targeted advertising and I gained tremendous experience working closely with the Founder and Lead Engineer. HTML, CSS, JQUERY

EDUCATION

FULL-STACK JAVASCRIPT
Coding House
Fremont, CA

(January 2016 to April 2016)

14-week full immersion web development bootcamp in silicon valley that focuses on the MEAN stack.

MARKETING
Ohio State University
Columbus, OH

(2008 - 2011)

Attended the Fisher College of Business's Marketing program with a focus on branding and new media.

3D GAME & SIMULATION
Shawnee State University
Portsmouth, OH

(2006 - 2008)

Attended the first class of the new, cutting-edge 3d game & simulation course offered at Shawnee State University. This was my first professional instruction and formal introduction to programming. Most of my work was in Python so it was great introduction to concepts like object oriented design.
